

# CoolBest II®

Thermolysis and Coolness

LIBOLON develops CoolBest II® to respond environmentally friendly. It's not only has the quick dry function as CoolBest®, but also adds the cooling powders which absorbs heat slowly and dissipates heat quickly.

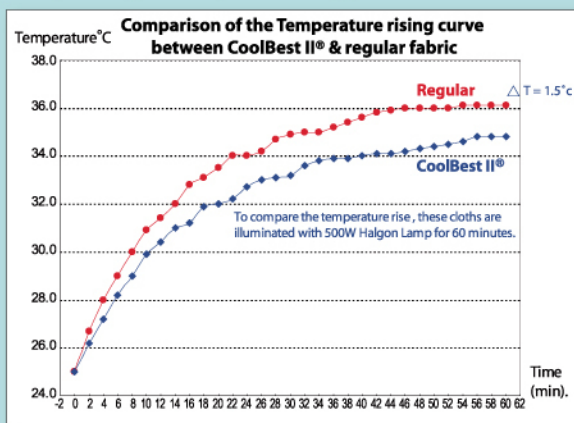

Coolbest II® is able to cool down the temperature about 1 to 2 degree. In this way, you do not even need to turn on air conditioner to maintain cooler room temperature. It responds the energy saving.

(According to the report of Bureau of Energy, Ministry of Economic Affairs, it can save 6% of power when the temperature of air conditioner is raised 1°C. Thus, it can reduce 1 billion kWh power consumption in Taiwan. By reducing the emission to 660g CO<sub>2</sub> per kWh, we can also save 6.6 million tonnes of CO<sub>2</sub> emissions annually.)

## Product Features

- UV-Cut.
- Effectively moisture regain and quick dry.
- Effectively dissipates heat away from skin to make you cooler and comfortable.
- Environmentally friendly and helps save energy.

## Product Application

*Clothes: spring and summer shirts, trousers, underwear, lining, and sports & casual wear.*

*Homertextile  
Footwear*
