

Litan[®]

Bamboo / Coconut Charcoal Fiber

Litan[®] is a bamboo/coconut charcoal fiber, which naturally regulates humidity and stimulates blood circulation. Litan's antibacterial properties are enhanced by the addition of antibacterial nano materials during the polymerization process. Litan[®] is antibacterial, deodorizing and humidity regulating.

Product Features

- **Release Far Infrared Ray**
The charred bamboo/coconut can radiate far infrared ray to stimulate blood circulation and keep body warm.
- **Regulate Humidity**
The micro holes of the charred bamboo/coconut can regulate humidity effectively.
- **Emit Anion**
The added bamboo/coconut charcoal powder can emit healthy anion to make people healthy.
- **Antibacterial and Deodorizing Ability**
The antibacterial material mixed in the fiber can effectively restrain the growth of bacterial to reduce the stink.

Product Application

- **Clothing Textiles**
Leisure wear, Sportswear, Underwear, Pajamas, Hat, Scarf, Gloves, Socks
- **Upholstery**
Curtain, Bedding, Towel, Shoe insoles
- **Health Products**
Kneepad, Wristlets, Corset
