

Suede

Sea Island Microfiber / Split Type Microfiber

This product is a composite textured yarn and made of high-shrinkage yarn and split-type or sea island microfiber. Thus it has different shrinkage and bulk effects, suede look and feel after reduction.

Split Type Microfiber

Sea Island Microfiber

Product Features

■ Soft Touch

The diameter of the microfiber is small and low in bending friction, so they are soft and delicate in touching and smooth in hand feeling.

■ Ventilation and Comfort

Microfiber has more filament numbers than the regular yarn, so fiber's surface area is big and can imitate the micro-porous structure of natural leather to increase the ventilation of the clothes.

■ Thermal Insulation

Due to the delicate touching of fabric and a packed density, the fabric can generate a micro-weather effect, with the thermal insulation feature.

Product Application

*Windbreaker, Coat, Jacket, Furniture Fabric,
Wiping Cloth, Artificial Leather, Bedding*
